Table of Contents: Volume 10 (1996)

Number 1

A Formal Approach to the Specification and the Behavior Validation of Real-Time Systems Based on Rewriting Logic ..... *Ammar Attoui and Michel Schneider* 5

Algorithms and Optimality of Scheduling Soft Aperiodic Requests in Fixed-Priority Preemptive Systems ..... *Too-Seng Tia, Jane W.-S. Liu, and Mallikarjun Shankar* 23

Causal Delivery Protocols in Real-Time Systems: A Generic Model ..... *Paulo Veríssimo* 45

Real-Time Communication in FDDI Networks ..... *Nicholas Malcolm, Sanjay Kamat, and Wei Zhao* 75

Contributing Authors 109

Number 2

Quantitative Analysis of Hardware Support for Real-Time Operating Systems ..... *Saurav Chatterjee and Jay Strosnider* 123

Specification and Verification of Reactive System Behaviour: The Railroad Crossing Example..... *James Armstrong and Leonor Barroca* 143

Scheduling Aperiodic Tasks in Dynamic Priority Systems ..... *Marco Spuri and Giorgio Buttazzo* 179

Contributing Authors 211

Number 3

Predictability of a RTX2000-based Implementation ..... *Charles André and Marie-Agnès Péraldi* 223

Causal Delivery of Messages with Real-Time Data in Unreliable Networks ..... *Roberto Baldoni, Achour Mostefaoui, and Michel Raynal* 245

Towards a Stable Earliest Deadline Scheduling Algorithm ..... *J. Delacroix* 263

A Scheduling Algorithm for Tasks Described by Time Value Function ..... *Ken Chen and Paul Muhlethaler* 293

Contributing Authors 313
